

Tulevaisuuden työelämä - kansainvälistyvä Suomi

Työmarkkinoilta **poistuu enemmän työvoimaa** kuin sinne tulee tilalle!

Vuonna 2024 yhteensä **57 800** henkilöä siirtyi työeläkkeelle.

2024 työllisten määrä laski selvästi – **25 000 vähemmän** vuoden takaiseen verrattuna.

työvoimaa **ulkomailta**

Hi my fellow practical nurses!

Not to brag but to inspire. Last January, I joined the joint application program of different universities in Finland. I applied into 2 different universities for 2 degree courses. BS in nursing and BS in social services. Luckily I passed the 2 phases of examinations and got an offer to study in Diakonia University of Applied Sciences. The school year has started and there are a lot of challenges and changes in both working and personal life. Since I will be studying full time, my work contract will be changed from 100% to maybe 60% to manage my time in work and study. This means that my salary will be affected. Because of that, I applied for student housing, and I was granted to move with my family in a student apartment. Student apartment is more cheaper and it includes water and electricity. Tuition fee is free, students have meals and transportation subsidy.

I am very thankful to HSS, the opportunity they offered to us has a lot of possibilities.

Looking back when we were in our employers' apartment in Hong Kong and Singapore, our quiet and tiny bedroom was our classroom and a lot of us were hiding while studying.

That bedroom turned into a real university now. Just dream and always remember that our situation now doesn't define our future!
